

**User Workflow Overview**  
Upon the selection of the Observations Tab, the user can view all observations and arrange the order by their preference. If an observation is selected from the accordion section, the observation can reviewed and/or edited. When the user selects the New Entry button, a new tray will appear which allows the user to "Select a Problem", which will open an entry form for completion pertaining to the patient's problem(s).

**Notes:**  
<sup>1</sup> If the user selects yes to Edit the field, it will activate the current text for editing.  
<sup>2</sup> From the cancellation modal, if the user selects yes, the item will delete and return to the next list item. If the user selects no, then the modal will close and return to the delete button.  
<sup>3</sup> If the user selects the Add Annotation button, the content written by the user will be an added line.  
<sup>4</sup> System error on submittal. The tray will close, alert modal will appear with an OK button and the user will have to start over. The message - System Error: (XXXX)
