

## User Workflow Overview:

Upon the selection of the Task Tab, the user can view tasks and arrange the order by their preference. If a task is selected from the accordion section, the tasks can reviewed and/or edited. When the user selects the Create a New Task button, a new tray will appear which allows the user to select the Lab Tests, which will open a form for completion. If a user wishes to sign a task, the user is required to enter a signature code, if the signature is correct, a modal will inform the user the task has been signed.
