4   The specific Type of Visit options and Available/Selected Modifiers is dependent on what the user chooses from the Type of Visit section

5   If there are already comments associated with a diagnosis, the user will see an icon in the "Comments" column in the "Selected Diagnoses" section. Otherwise, the user will see the "Add" button.

6 If the user selects the "x" button, the selected procedure is removed from the section, and the screen reader continues to the next item.

F413 - CPRS Encounters – User Experience – Add or Edit a Comment

Add a Comment

○ → Comment text box (new entry) → "Add Comment" button

Edit a Comment

○ → Comment text box → Cancel button → ◇ User selected the Cancel button? → Yes → ●

No → Save button

User Overview

For the "Selected Diagnoses" section and the "Selected Procedures" section, the user may add in additional comments or edit his/her own comments by typing into the field that appears after the user selects the Edit icon next to the appropriate comment. While editing, the user may choose to select the "Cancel" button, which does not save the changes the user made. Otherwise, the user may select the "Save" button to save his/her changes to the comment.
